

ELLENEX LPWAN SOLUTION

INFRASTRUCTURE MONITORING FRAMEWORK

FOR

DISTRIBUTED INDUSTRIAL ASSETS

THE PROBLEM

Manual monitoring and legacy systems create inefficiencies across more than 1 billion industrial assets in remote or hard-to-access locations

80% not monitored
20% monitored

Monitoring

90% are alert-only
10% provide actionable intelligence

Decision Making

THE PROBLEM

Remote asset monitoring can reduce operation monitoring costs by up to:

75%

It Helps to Manage:

- Delayed Response to Failures
- Safety Risks
- Service Inconsistency
- Inefficient Resource Allocation

THE SOLUTION

INDUSTRIAL MONITORING FRAMEWORK

designed to address five infrastructure priorities:

- Asset Visibility,
- Resilient Operations,
- Compliance,
- Predictive Performance,
- And Resource Efficiency.

THE SOLUTION

INTEGRATABLE FRAMEWORK

- collects data,
- supports decisions,
- enables action

OVERVIEW

ELLENEX is a technology brand owned by LPWAN Holding Inc., located in the heart of Silicon Valley.

FIRST company, introduced integrated LPWAN Pressure and Level sensors to the market.

ONLY company, offers MODULAR & INTEGRATABLE solutions based on 5 LPWAN technologies.

Offering one of the **WIDEST** range of industrial LPWAN solutions in the market (30 product family, 5,000 SKU).

pressure sensor

level sensor

temperature sensor

totaliser and flowmeter

distance sensor

water quality

moisture, humidity & rain

NB-IoT

LTE CAT M1

LoRaWAN™

LOW POWER SATELLITE

WIREPAS

agriculture

water

smart cities

logistics

oil and gas

mining

building

GLOBAL DEPLOYMENT

WHO WE ARE NOT

- **We manufacture** a wide range of industrial IoT devices, but
we are not another device manufacturer
- **We designed** one of the widest range of LPWAN interfaces, but
we are not another design house
- **We developed** state of the art microservice platform, but
we are not another IoT software company

WE ...

Have developed a unique industrial framework to address the complexities of Industrial Infrastructure Management and post-AI market demands, with specific focus on “WATER INFRASTRUCTURE MONITORING”.

MOJULAR BUILDING BLOCKS

Our “MOJULAR” building block model provides ultimate flexibility for asset-to-action monitoring cycle

OUR OFFERING

- **Pre-configured Hardware**

For Reliable Data Capture

&

- **Integratable Platform**

to Close the Action Loop

low power

end to end

composable

network agnostic

industry focused

integratable

PRODUCTS

The most comprehensive range of industrial LPWAN sensors and sensor interfaces for connecting field assets to the cloud

Pressure Sensor

Level Sensor

Temperature Sensor

Water Quality

Distance Sensor

Voltage / Current
Cathodic Protection

Totaliser & Flowmeter

Moisture, Humidity & Rain

Single-Channel Interface

Multi-Channel Interface

PLATFORM

- Enterprise-grade architecture
- Role-based access control
- API-first and serverless
- Multi-channel alerting
- Preconfigured, simple, and scalable
- Interactive mobile application
- patent pending adaptive rule engine

CONNECTIVITY

We offer multiple LPWAN connectivity options to cover a wide range of industrial applications and deployment environments.

NB-IoT

LTE CAT M1

LoRaWAN™

LOW POWER SATELLITE

WIREPAS

SOLUTION PACKAGES

SOLUTION PACKAGES

A unique
portfolio
for
Water
infrastructure
Management

IMPACT VISION

Zero-injury in operations through automation.

8+ million tons of CO₂ emissions reduction, driving sustainability.

500 million hours saving for clients.

\$30B+ in cost savings across industries.

MORE TO COME

- Adaptive Rule Engine
- NTN Connectivity
- Global Certifications
- Integration with AI Orchestrators
